

Strive

Strive Portal

The Strive Portal can be accessed by going to:

www.strivecast.tv

Strive Portal

The Portal is the control center for your organization.

You can schedule events, add teams & players and update your organization details.

It also acts as a viewing portal for live and recent games, and has custom viewing options.

Upload Speeds

Transfer time of 1 Hour of 4K footage (~10GB) with varying upload speeds

File Size	School Bandwidth	Transfer Time
10Gb	10 Mbps	~2 Hours
10Gb	20 Mbps	~1 Hour
10Gb	50 Mbps	~45 Mins
10Gb	100 Mbps	~20 Mins

As an Admin - Staff Member / Coach

The portal is your administrative panel for the Strive solution. From the portal you can schedule events, update your team roster, and upload videos/graphics that can be later used as overlays in the Strive Producer iPad app.

As a staff member or coach, you can schedule live events to be streamed to Strivecast.tv, to YouTube (after linking your YouTube channel to your Strive Portal account), or any streaming service of your choice. All you need to do is select a venue and the cameras you wish to use. The stream will start automatically at the scheduled time.

The portal allows you to create "Highlight Clips" that you can share with your audience. This is approved content that you can create for the team or even specific players.

As a coach, the portal is where you review post-practice and/or game footage. The video is typically uploaded from the Strive Edge (Edge Computer and Proprietary Software) in about 30-60 minutes after the end of the recording (See 'Upload Speeds' chart on the left). You can access the raw footage file and use the camera tools (Pan, Tilt, and Zoom) to follow different players and create clips to share with each player. Downloading highlight clips is also easy; just specify the time and Region of Interest (area of the raw footage you want to create a clip of), along with the quality and file format of your choice.

From the portal you can also manage your fans/followers. You can approve or deny access to different users, and set your videos to private or public. We also have a built-in Email Distribution tool, which allows you to send emails to your audience about upcoming events.

You can also post blogs or news articles on the portal to share any updates and/or announcements.

As a Member - Parent / Student (Authentication Is Required)

As a parent or student, you can login to follow your favorite teams, see scheduled upcoming events, and visit a team page to learn more about the players and coaches. The team page information is updated by the team's staff members or coaches. You also have access to all the previous games and event footage.

The "Event Page" is a dedicated page for an event/game. On this page you can comment and share picture and videos with other fans. You can also access the timeline for previously recorded events, which is a list of bookmarks or highlights marked on the video. Clicking on these bookmarks on the timeline allows you to quickly jump to different parts of the action, such as goals, plays, and fouls.

As a member you can also create "Custom Cuts". This means you will have access to the raw video captured by our camera and create your own video highlight clips. These clips can then be downloaded and saved to your desktop.

All of the footage is free to download and to share on Facebook, Twitter, etc.

As a Guest (No Login Required)

As a guest of the site, you can explore games that have happened around your location, search for your favorite teams, and even watch live events. All other features require registering as a member or staff member.
